

Lesson Assessment – Introduction to Prompting Frameworks

Name: Shaik Mohammad Shaheed

Course: Prompt Engineering

Lesson: Introduction to Prompting Frameworks

Exercise 1 – RTICFA Framework

Framework: RTICFA (Role, Task, Input, Context, Format, Audience)

Prompt

Role: You are an experienced content writer.

Task: Write an engaging blog introduction.

Input: The product is a mobile productivity app that helps users organize daily tasks, set reminders, and improve time management.

Context: The introduction will appear on the company's official blog to introduce the app to potential users.

Format: Write one engaging introductory paragraph (100–120 words).

Audience: Beginners looking for an easy-to-use productivity app.

Exercise 2 – ERA Framework

Framework: Expectation, Role, Action

Prompt

Expectation: Generate a polite and professional follow-up email that thanks the client for attending the meeting and clearly outlines the next steps.

Role: You are a Business Relationship Manager.

Action: Write a follow-up email after a client meeting.

Exercise 3 – APEX Framework

Framework: Action, Purpose, Expectation

Prompt

Action: Write an Instagram post announcing a new café opening.

Purpose: Attract local customers and encourage them to visit.

Expectation: Use a friendly promotional tone, keep the caption under 100 words, include relevant emojis, and finish with a clear call-to-action.

Exercise 4 – TASK Framework

Framework: Task, Action, Context

Prompt

Task: Respond to a customer complaint regarding delayed delivery.

Action: Apologize sincerely, explain the delay, and provide a suitable resolution.

Context: The customer's order was delayed due to unexpected logistics issues, and they are frustrated because it was intended as a birthday gift.

Exercise 5 – CARE Framework

Framework: Context, Action, Result, Example

Prompt

Context: A company is onboarding new employees who need to understand the leave policy.

Action: Explain the company's leave policy in simple language.

Result: Ensure employees understand how annual leave, sick leave, and leave requests work.

Example: Include one example explaining how an employee can apply for leave.

Exercise 6 – RISE Framework

Framework: Role, Input, Steps, Example

Prompt

Role: You are an AI trainer.

Input: Explain the concept of APIs.

Steps:

1. Define what an API is.
2. Explain how it works.

3. Describe why APIs are useful.
4. Keep the explanation simple.

Example: Use a real-world analogy, such as ordering food in a restaurant.

Exercise 7 – CASE Framework

Framework: Context, Action, Scenario, Example

Prompt

Context: A company is hiring fresh graduates for an entry-level software developer position.

Action: Generate interview questions.

Scenario: Candidates have limited professional experience but possess basic programming knowledge.

Example: Include a mix of technical and behavioral interview questions.

Exercise 8 – ACRE Framework

Framework: Audience, Context, Request, Example

Prompt

Audience: Company employees.

Context: The organization will remain closed next Friday for a public holiday.

Request: Write a professional internal announcement informing employees about the holiday.

Example: Include a sample announcement with a friendly and professional tone.

Conclusion

This assessment demonstrates my understanding of structured prompting frameworks, including **RTICFA, ERA, APEX, TASK, CARE, RISE, CASE, and ACRE**. By applying these frameworks, I learned how to create clear, structured, and reusable prompts that improve the quality, consistency, and effectiveness of AI-generated responses for real-world applications.
